

Intern 1: Ye line manager wala woh hai matlab... matlab... line manager... line manager se portal view kar rahe hain hum.

Instructor: Toh line manager toh Maansi thi.

Intern 1: Toh hum abhi portal view kar rahe hain.

Instructor: Toh portal toh kisi employee ka view kar rahe hain. Haan ye dekho, haan ye dekho. Line... ye cheeze toh same rahengi na? Ye cheeze?

Intern 1: Achha.

Instructor: Haan toh aap ye batao na aap line manager kisi pe bhi click karte ho view portal... aapne ab kya kiya? Aapne us ka login karwa diya.

Intern 1: Haan, humne us ka view karwa diya ki woh...

Instructor: Nahin, kabhi bhi ye nahin hota hai ki peeche manager usko control kar raha hai but ye nahin ki aap us pe login karwa rahe ho... ki Aditya ki profile pe aap ja rahe ho. Aditya ka jitna hai woh aapka yahan pe dekh sakte hain. Jaise abhi aap test mail employee pe gaye, aapka pura portal aapka line manager se employee wale pe chala gaya hai.

Intern 1: Toh sir jaise hum... agar hum woh nahin karenge toh hum uski attendance ho gayi...

Instructor: Haan toh woh view ho sakti hai attendance aap save kara rahe ho kahin bhi. Toh wahan simple kya karoge aap? GET karoge yahan pe ki is employee ne kitne baje check-in kiya hai. Wahan pe dikh jayega unko. Theek hai?

Aur ek ye thoda matlab har employee ka jab us mein jaoge na line manager wale mein jahan pe employees wala hai, wahan pe is type ke graph dikha do. Aap leaves ka dikha sakte ho ki kiski kitni abhi pending leaves hain chahe usko table mein dikha do. Kitne 8 hi toh hain aapke paas employees, maximum 10 ho jayenge, 15 ho jayenge. Table mein toh sab kuch dikh sakta hai ki inke... inko leave kitni mili hui hai aur unhone taken kitni hai, toh sab dikh jayega wahan pe. Alag-alag visualization aap bana sakte ho iski.

Intern 1: Theek hai, main fir iska icon add kar dunga yahan pe us ka... jo ye graph wala ka hai.

Instructor: Kyun graph ko karoge jab aapke paas dashboard pe tab hai 'Add or manage employee'? Click karo is tab pe.

Intern 1: Yahi ho rakha hai.

Instructor: Add employee?

Intern 1: Abhi view registered...

Instructor: View registered pe... haan aur ye saare jo bhi register recent hue hain.

Intern 1: Aapka last hide registered karna, ye idhar wala. Achha.

Instructor: Aur dusre pe jaana, departmental roster pe jaana. Haan jaise ye hai aapka, ye home page kind of kar lo. Toh sabse pehle toh aapki abhi 5 members hain, present today pe yahan pe kya hai zero active. Maan lo ki us ne jithon ne yahan pe login kiya toh woh change ho jayega. Aapka theek hai? Presence rate jo bhi aapki percentage aa jayegi ya percentage rate ki jagah yahan pe kuch aur kar sakte hain. Toh jaise ek table yahan pe aa gayi. Theek hai? Abhi ya toh aap kya kar sakte ho jis bhi

employee pe click kare toh us employee ka ek pura page aana chahiye. Ab aapko kya karna chahiye tha, yahi hoti hai hierarchy matlab paging hierarchy ya jo aap us mein bolte ho. Ki maan lo main yahan kisi bhi employee pe click karunga toh uski kya-kya detail hogi? Unko assigned leave kitni hai, assigned work from home kitne hain... dobara upar cards ki form mein aa jayega. Assigned, Taken... Assigned, Taken. Fir niche aap unka bar chart mein ye dikha sakte ho ki bhai pure monthly upar month ka drop-down de do ki month select karein aur uske baad aap inka dekh sako ki inhone kis-kis time woh kiya hai. Jis time login nahin kiya automatically leave mark kar do.

Intern 1: Toh matlab iska ye karna hai ki pura portal na view karwa ke...

Instructor: Haan, pura portal na karwa ke ye puri ki puri ko clickable bana lo isko. Aur is pe jahan bhi click kare toh us employee ka jitna bhi hai jo ek admin ko dikhna chahiye... uski jo admin woh details hain ki attendance, tasks... tasks bhi matlab haan is mein hum dikha sakte hain jaise manage task.

Intern 1: Task toh waise yahan se dikh jayega, jo daily task sheet hai. Ye daily task sheet aayegi toh us mein woh jo-jo kaam kar rahe hain woh sab daalte rahenge.

Instructor: Haan, toh theek matlab yahan sabka agar dekhna chahein na woh toh har employee ka at least ek page hona chahiye admin ke paas dekhne ka, admin line manager ke paas.

Intern 1: Theek hai.

Instructor: Ek se.

Intern 1: Kya? Jaise ye attendance mein sabki history dikh rahi hai, kisne kitna...

Instructor: Haan is type ka woh kar do ki aap matlab table mein aa gaya ye ki bhai working hours itne hain, inke date aa gaya yahan pe.

Intern 1: Date aa gaya, month...

Instructor: Haan, yahan se aapne month select kiya but aapne month mein yahan pe toh ek hi dikha raha hai ye...

Intern 1: Haan kyunki isi month ka data hai na abhi.

Instructor: Achha achha nahin matlab ye is mein yahan pe toh date-wise hona chahiye na month ki jagah yahan pe.

Intern 1: Haan abhi is mein isi month ka hai toh isliye abhi is mein aisa hai. Agar us mein aur month ki details add ho jayengi toh fir woh us hisab se dikhayega.

Instructor: Theek hai theek hai haan theek hai baaki aise hi... but aap isko sort kar sakte hain na date-wise ki ek date ka sirf... ek date ka jaise aapke paas paanch employees hain toh paanchon employees ka ek date ka dikha de pehle fir usko sort karna padega aapko aise ki pehle jaise for example 10 ka dikha raha hai... filter... haan fir jaise... waise aapke mein hai fir aapke mein 9 ka dikha raha hai, aap aise bhi kar sakte ho. Aur same isko agar matlab ye ho gaya fir aap jaise inki table hai na, table pe click karne mein aasaan hoga dekhna ki iske baad ki jaise maine Prachi pe click kiya... Prachi ka aa jaye pehle table form mein aa jaye ki har employee ka present date aur us... uski historical chalta jaye. Niche uska bar chart aa jaye ki aapko table mein dena hai chart mein dena hai fir uske upar cards ki format mein unki leave aa jaye ki kitni leave li hai kya hai jis din sign in nahin kiya unhone us din automatically red mark kar do us table ko. Toh ye UI/UX hota hai aur ye tumhe khud sochna hota hai. Matlab feature ka toh fir bhi maan lete hain toh ye saari cheeze.

Theek hai? Abhi bhi tum dono hi kaam kar rahe ho is pe?

Intern 1: Nahin, humne ye socha tha ki kisi ka agar nahin hoga toh fir apne resume us mein jud jayega na git pe upload ho jayega.

Instructor: Haan woh toh tum waise bhi kar sakte ho us mein ek baar bolna Claude ko change kar dega. Achha hai ye.

Intern 1: Aur ek employee ID banayi thi. Sabke jaise har department ka pehle ke do letters alag hain, jaise Research department ka pehle ke letters 10 hain, Tech department ke 99 hain, toh us hisab se ID generate karna.

Instructor: Abhi ho gaya. Ye department status dikh jayega ki kaun kaun... koi chutti par hai toh kisne kisko work assign kara hai. Yahan pe hum transfer woh kar sakte hain choose leave karke. Aur ye choose leave tabhi hoga jab aapki leave approve hogi tabhi yahan pe option dikhayega warna woh nahin karega. Ye daily task sheet hai jahan pe aap hamara daily task karke submit karenge date-wise. Aur ye annual leave approval jo hai us ke liye... fir ye same hierarchy dikhegi yahan pe.

Aur jo directory banane ko bola tha saare employees dikh jaye saare sabhi departments ke?

Intern 1: Toh organization chart na matlab...

Instructor: Organization chart alag hota hai, ek aapko bola tha directory—employee ka contact, email kis us mein hai, woh saari cheeze sab us ke dikh jaye ki upar tabs aa jaye yahan pe alag-alag department ki click karke usko dekh sakein. Upar hi chart bola tha. Icon.

Intern 1: Achha mujhe laga ye wala chart woh tha ki department chart banana hai ye...

Instructor: Nahin kyunki is mein toh sirf aapne ye diya hai manager hai, employee hai kya hai but humein chahiye ki kisi ko call karna hai unki personal details pe kuch aa jaye. My Profile... My Profile mein ye saari cheeze hongi... ye puri directory bani hui hai sab departments ki. Haan toh yahan se aap department choose karo aur wahan pe email hai toh yahan pe aap department aa gaya rank kya hai, active hai, kaun kaise... haan toh ye sahi hai ki kab join kiya tha isi mein aap woh check kar sakte ho. Ek mobile number aur daal dena, official aur personal chahe do daal do.

Aur bhai same ye pending request jaa rakhi hai humne. Attendance jo hamari... bhai yahan pe dikh jayengi hamari daily attendance history aur percentage wise. Meeting aur 'My Task' jo bhi humein task assign hoga woh yahan pe manager ke woh se ya fir admin se toh yahan dikh jayega.
